

ABOUT

Prospective student with strong academic performance and work experience. Solid foundation in Machine Learning and Data Science tools and technologies. Actively engaged in extra-curricular academic activities, including research projects and teaching assistant-ship. Proficient in English with TOEFL iBT score of 110/120 (C1) and familiar with German (A1).

EDUCATION

University of Guilan

Bachelor of Science, Computer Engineering

Rasht, Guilan, Iran

September 2021 - September 2025

- GPA: **18.77/20 (3.81/4.0)**, Last two years GPA: **19.48/20 (4.0/4.0)**
- Ranked 4th out of 61 graduating students.

RESEARCH INTERESTS

☐ Computational Linguistics and NLP ☐ AI in IoT and Robotics ☐ Generative AI ☐ Applied Deep Learning

PUBLICATIONS AND RESEARCH EXPERIENCE

- Fatemeh Ahmadi, Anita Kamani, **Rastin Maleki**, Pooya Kazemian, Yasaman Boreshban and S. A. Mirroshandel. **“PerCG: The Persian Common Ground Dialogue Corpus”**
Submitted to Language Resources and Evaluation
Co-authored a research paper focused on building a Persian dataset for understanding and predicting common ground in conversations, and evaluating LLMs on this task. [\[Preview\]](#)
- Sepehr Rezaii Melal, **Rastin Maleki**, M. Amin Rezanezhad, Mahdi Aminian, and S. M. Shekarian. **“Modeling the Prediction of Indoor Humidity and Temperature in Smart Greenhouses by Combining LSTM and IoT”**
In preparation
Co-authoring a research paper focused on combining IoT systems with LSTM models to predict indoor humidity and temperature.
- Rastin Maleki**, Mahdi Aminian. **“PolySilicon and Metal - A Glimpse on MOSFETs Design Challenges.”**
[\[PDF\]](#)
Research Report
Conducted a research report exploring the changes in MOSFETs’ gate electrode material throughout time as the final research project for AVLSI course. Through this project, I learned how to properly write academic content following proper formatting, creating figures, and managing references.

EXPERIENCE

Machine Learning Developer

SeeNous 

Mashhad, Razavi Khorasan (Remote Part-time)

Since January 2025

- Trained deep learning models on vibration data for fault detection in industrial machinery.
- Built desktop applications tailored to company requirements using Qt.
- Developed data cleaning pipelines.
- Integrated a Motion Detection and Amplification feature into the company’s product.

Teaching Assistant

6 Courses

University of Guilan

September 2021 - September 2025

- Designed and assessed assignments and projects, prepared supplementary materials, and conducted weekly troubleshooting sessions for undergraduate courses.
- Courses: Data Structures (Dr. S. A. Mirroshandel), Discrete Mathematics (Dr. S. M. Shekarian), Electronic Circuits (Dr. Mahdi Aminian), Advanced Programming (Dr. S. A. Mirroshandel), Fundamentals of Computer Programming (Dr. S. M. Shekarian), Theory of Formal Languages and Automata (Dr. S. M. Shekarian)

SELECTED PROJECTS (MORE PROJECTS ON GITHUB)

Condmaster Extension <i>Qt, Software Development, FastAPI</i>	January 2026 <i>SeeNous</i>
Vibration Data Annotation Dashboard <i>Qt, Software Development</i>	October 2025 <i>SeeNous</i>
QA and RAG on Guilan Food Recipes  <i>PyTorch, Fine-Tuning, LLM, RAG</i>	September 2025 <i>Course Project</i>
EIIVA: Embedded Language Model and Virtual Assistant  <i>IoT, ESP32, Python, C, Hugging Face, LLM, TTS, STT</i>	January 2025 <i>Course Project</i>
Website Traffic Prediction  <i>Python, Data Science, Machine Learning, Classification Algorithms, Presentation and Documentation</i>	November 2024 <i>Datacamp Exam</i>
Product Sales Analysis  <i>Python, Data Analysis, Exploratory Data Analysis, Presentation and Documentation</i>	October 2024 <i>Datacamp Exam</i>
Physical Layout for a Two-Bit Comparator Using L-EDIT IC  <i>L-EDIT, Physical Layout, VLSI Design</i>	Winter 2024 <i>Course Project</i>
NeonBlaster: An Arcade Shooting Game on FPGA  <i>Cyclone® V FPGA, VHDL, Quartus Prime</i>	Fall 2023 <i>Course Project</i>
Bomber Friends Game  <i>Java, Java Swing, GUI, OOP</i>	Spring 2022 <i>Course Project</i>

SELECTED CERTIFICATIONS

Machine Learning Specialization (3 Courses)  <i>Machine Learning, Deep Learning, Reinforcement Learning, Data Ethics</i>	Coursera DeepLearning.AI <i>August 2025</i>
Python for Everybody Specialization (5 Courses)  <i>Web Scraping, Databases, Programming Principles, File Management, Data Cleansing</i>	Coursera <i>July 2025</i>
Data Scientist Certificate (Manually Graded Practical Exam)  <i>Exploratory Analysis, Statistical Experimentation, Model Development, Communication and Reporting</i>	DataCamp <i>November 2024</i>
Data Analyst Certificate (Manually Graded Practical Exam)  <i>Analytic Fundamentals, Exploratory Analysis, Data Management, Visualization and Reporting</i>	DataCamp <i>October 2024</i>
Data Engineer Certificate (Manually Graded Practical Exam)  <i>Programming for Data Engineering, Data Management, Exploratory Analysis</i>	DataCamp <i>October 2024</i>
SQL Associate Certificate  <i>Exploratory Analysis, Data Management</i>	DataCamp <i>October 2024</i>

HONORS AND AWARDS

• Ranked 4th among 61 undergraduate students of major (2025). • Acknowledged as exceptional talent by the University of Guilan for outstanding achievements (2025).  • Achieved 2nd place in a university-level programming contest called Guilan CodeCup (2025).  • Designed innovative problems for a university-level programming contest called Guilan ACM (2024).  • Ranked within the top 6% among 127,000 participants in undergraduate Mathematics and Physics Iranian University Entrance Exam (SAT, the US equivalent) (2021). • Ranked within the top 0.7% among 130,000 participants in undergraduate Foreign Languages Iranian University Entrance Exam (2021).
